

RESTLESS EARTH

This is an exciting geography led topic where we will discover all about the causes and the impact that earthquakes and volcanic eruptions have on the nearby population. We will explore the most extreme forms of weather and learn more about map reading. Our visit to the Natural History Museum, Tuesday 28th February, provides a brilliant hook to our topic.

Our world is forever changing and evolving. Are you brave enough to join us on this adventure? Beware! We will be faced with wild weather, changing climates, devastating earthquakes and violent volcanoes as we explore and learn more about our hazardous and restless Earth...

Details to follow (after half term) regarding the topic outcome for this unit.

Our school website now has a dedicated SATs web page. We really appreciate your continued support in preparing your child/children for the SATs which are rapidly approaching (w/c Monday 8th May). We will continue to focus on preparation for the Reading, Maths, Spelling, Punctuation and Grammar tests in class and through home learning. As always please do not hesitate to contact us if you have any concerns regarding your child.

Antarctica Survival/Training Day

On Tuesday 21st March the children will take part in several activities to develop their understanding of survival and leadership, applying them to Shackleton and his Antarctic adventure. Please ensure children come to school dressed for a day outside (warm clothes and suitable footwear). We will not be leaving the school grounds!

TEAM VI Internet Safety Day

The internet is amazing. Children can play, learn, create and connect - opening up a whole world of exciting possibilities. But how do we make sure they're staying safe? On Monday 27th February, our lessons will focus on internet safety and helping children to stay safe online.
